

Updating Florida's Floodplain Maps

The Solution: Flood Map Modernization (2004-2011)

- Local, state and federal governments share knowledge and expertise
- New technologies make gathering and sharing data quicker and more reliable
- Digital data is more accessible, and more quickly updated

Who Benefits from Flood Map Modernization?

- Residents
- Businesses
- Property Owners
- Local Governments (counties and cities, towns and villages)
- Communities
- State Governments
- Federal Governments

Updated maps help individuals, communities, businesses and governments assess flooding risks, manage floodplains and wetlands, and determine land use and emergency planning needs
